\*-y \*ey \*ie = often a sound between /i/ and /ee/

units 1-5	mainly simple code with options to extend into complex code	1st	2nd	3rd	4th	5th		
units 6-12	/air/, /eer/, /zh/, split digraphs and complex code	6th	7th	8th	9th	10th	11th	12th

The complexities of the English Alphabetic Code are:

1. One sound can be represented by one, two, three or four letters: e.g. z, sh, air, eigh
2. One sound can be represented by different spellings: e.g. /oa/ can be: o, oa, ow, oe, o-e, ough, eau
3. One spelling can represent multiple sounds:  
e.g. 'ough' can be code for /oa/ in **though**, /or/ in **thought**, /oo/ in **through**, /ou/ in **bough**, /u/ in **thorough**

1b-Building up the English Alphabetic Code highlights units 1 - 5 of Debbie Hepplewhite's Phonics International programme.

2b-Building up the English Alphabetic Code includes units 1 – 12 in black.

These charts can be used for training, planning, assessment, record-keeping and tracking.

There is a printable all-colour version and a plainer version of each chart.
